

# Neuroprothetics Exercise 7

## Filter Banks

Laura Bielenberg

28. Juni 2019

### 1 Tonotopy of a simplified cochlear implant model

#### 1.1 Electrode center frequencies

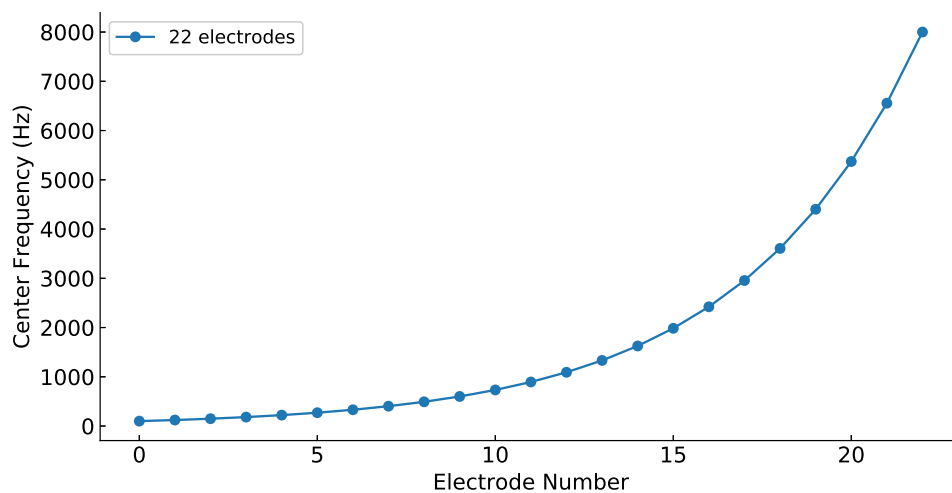

Figure 1: Center frequencies for CIs with different numbers of electrodes.

## 1.2 Implement a filter bank

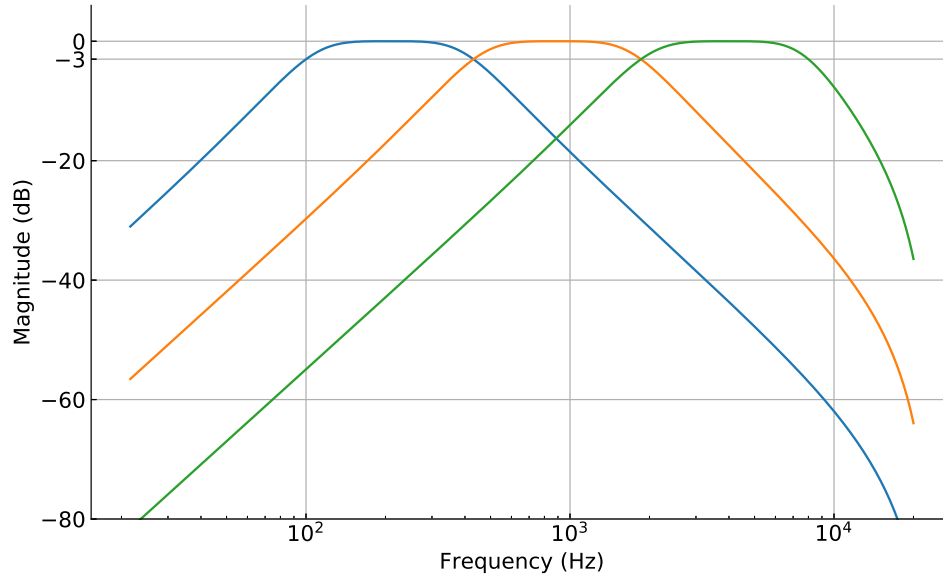

Figure 2: Frequency response of a second-order band-pass filter bank for a CI with three electrodes.

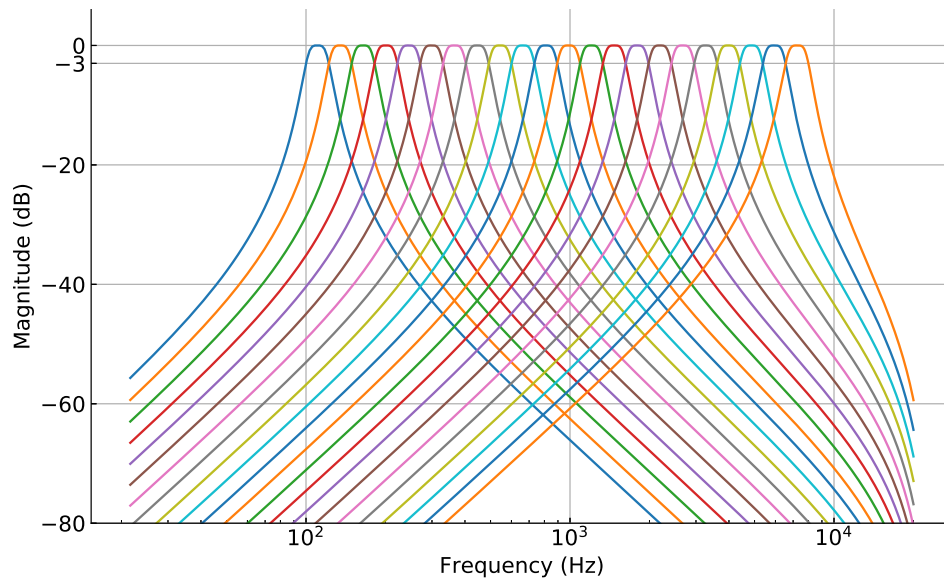

Figure 3: Frequency response of a second-order band-pass filter bank for a CI with 22 electrodes.

### 1.3 Filter a recorded signal

### 1.4 Join the channels
